PROJECT

LOG PARSER

Log parsing is the process of analyzing and extracting useful information from log files generated by computer systems, applications, or devices. Logs are records of events, actions, and transactions that occur within a system or software. They serve as valuable sources of information for troubleshooting, performance monitoring, security analysis, and auditing purposes.

YOUTUBE RECOMENDATION

Every major e-commerce or entertainment website recommends products to you based on various factors. Like how youtube, netflix recommends movies and shows to you or how amazon shows you products that it thinks you might be interested in. These are all based on some kind of recommendation system.

E-COMMERCE WEBSITE

An ecommerce website is your digital storefront on the internet. It facilitates the transaction between a buyer and seller. It is the virtual space where you showcase products, and online customers make selections.

ACHIEVEMENTS

- 🏆 *Level 5 CodingNinja Studio.*
- 🏆 *150+ Questions in LeetCode*
- 🏆 *Top 10 in GFG (Axis Colleges)*
- 🏆 *5 Star in Hacker Rank for Java, Python, DataStructures*

INTERNSHIP

- 👉 ***Campus Ambassador*** *at CodingNinja.*
- 👉 *Codsoft.*
- 👉 *BharatIntern.*

TRAINING

- 📖 ***DMSRDE**, Training at Defence Research & Development Organization.*

EDUCATION

Axis Institute OF Technology & Management (2020 - 2024)
B-Tech (CSE)CGPA -8.9

RVS Internatinal School (2019 - 2020)
Intermediate CGPA- 8.7

ABOUT ME

An entry-level programmer and developer, looking for an organization where I can utilize and sharpen my skill and use it effectively, along with that I have consistency and make problems easy to solve in nature.

SKILL

Java
